

AI for Business Intelligence:

# KEEPING HUMANS *IN THE LOOP*

Vladimir Kaladan Petkov

The background is a light gray with a bokeh effect of out-of-focus white circles. Three yellow circles of varying sizes are connected by thin yellow lines. One small circle is at the top, a medium circle is on the left, and a large circle is on the right. Lines connect the top circle to the left circle, the top circle to the right circle, and the left circle to the right circle.

# CREATE YOUR OWN SEMANTIC WEB

The benefits of

**having your own semantic web**

1.

- Constantly learning machine
- Increasingly accurate model
- Human supervision throughout

## 2.

- What gets inside stays inside
- No human knowledge is lost
- Acquired knowledge can be reused

### 3.

- Less man-hours on menial tasks
- Increased human productivity
- More insight based on bigger datasets
